Las Cruces, NM | Kyle.hough05@gmail.com | [LinkedIn](#) | [Github](#)

Technical Skills

Languages: Java, JavaScript(ES6, Node.js), Python, HTML, CSS, SQL | **Frameworks/Libraries:** Flask, Jinja2, Spring Boot, Bootstrap, React, Express | **Databases:** Mongoose, MySQL, MongoDB | **Tools:** AWS(EC2), MySQL Workbench, PostMan, Spring Tool Suite, Balsamiq, GitBash

Technical Projects

MTB Reviews | Lead Developer | [Github](#)

One-stop Mountain Bike and Trail reviews, built with Python / Flask

- Utilized MySQL to join a username, email, and password provided by user to create an account for reviews of a trail or bike.
- Designed a wireframe using Balsamiq utilizing Flask to import extension and support documentation that would continue throughout the webpage.
- Utilized Jinja2 to retrieve data provided by the user on the login page to populate user's information onto the current webpage
- Resorted background validations were created in python to ensure the information provided by the user during the login and creation of the bike and trail was provided correctly.

How to Lol | Lead Developer | [Github](#) | [How to Lol](#)

Learn how to play League of Legends, built with React.js/ Mongo/ Bootstrap

- Designed a wireframe using Balsamiq to project my ideas onto paper and give me a rough idea of how to proceed with my project.
- Utilized the RIOT API I was able to make the main webpage and fill it out with all the champions in the game
- Oversaw the database by using PostMan to make sure information was being stored correctly.
- Utilized MongoDB I was able to store data from the API and was able to put video links that would help a new player with these champions

Professional Experience
